

Guest Station Edition

Designed for channel sharing environments, the latest edition of Triveni Digital's award-winning GuideBuilder® XM transport stream encoder gives guest station broadcasters full control over their allotted ATSC 3.0 bandwidth independent of the host station. Now guest stations can fully configure their services, control signing certificates and DRM, and implement revenue-generating services such as datacasting while optimizing their service quality.

The solution for guest station broadcasters that want greater control over their ATSC 3.0 services in a shared ATSC 3.0 environment.

BENEFITS

- Take full control over allotted ATSC 3.0 bandwidth, independent of the host station.
- Simplify operations to save time and money.
- Optimize service video and audio quality.
- Ensure security with digital signatures and DRM.
- Maintain compatibility and coordination with lighthouse stations.
- Implement new revenue-generating services.
- Cost-effective seamless upgrade path to full-featured GuideBuilder XM when the guest station later becomes a host.

FEATURES

- Schedule provider, transport stream, DTV network, and output configuration.
- SRT outputs via DSTP links to Broadcast Gateways and third-party schedulers.
- ROUTE/MMTP encoding for ATSC 3.0 media and data streams.
- Network maps, graphs, and charts for real-time monitoring.
- Signing certificates and Digital Rights Management (DRM).
- System statistics, graphs, alarms, notifications, activity logs, and more.
