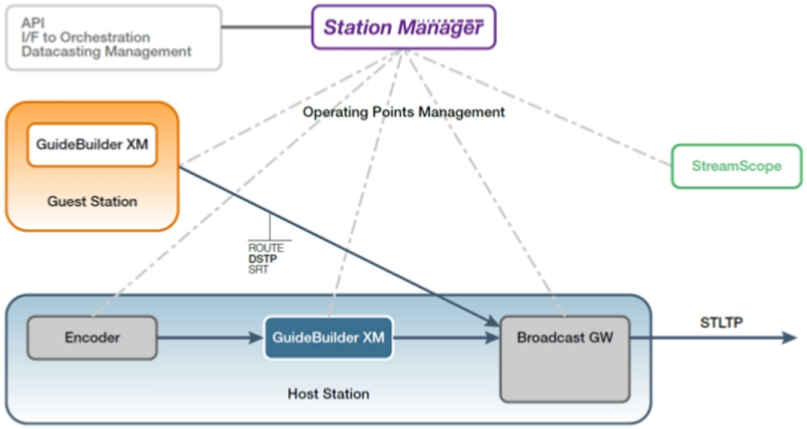
Station Manager

Broadcast Chain Management System

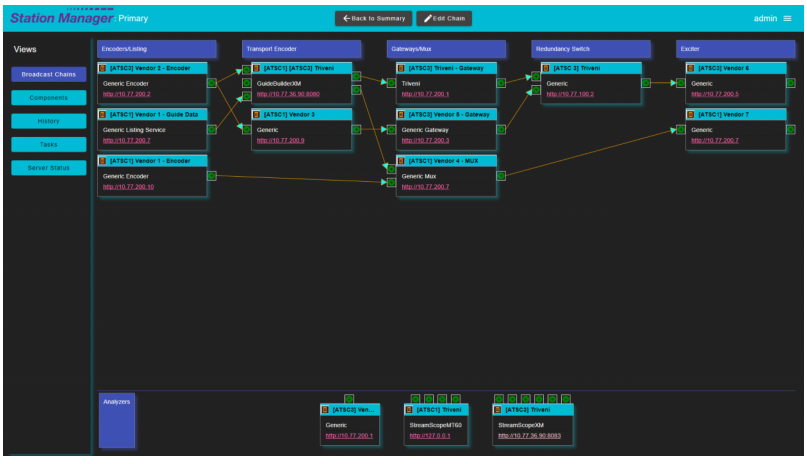
Streamline, Simplify, and Gain Control Over Your Broadcast Chain

The innovative new Station Manager from Triveni Digital is a management system that centralizes the configuration, control, and monitoring of ATSC 1.0 and ATSC 3.0 broadcast chains. The Station Manager provides broadcasters with a unified interface for managing every step of their workflows, including:

• Encoding • Configuration • Delivery • Usage Metering • Statistical Multiplexing • Service Availability



Station Manager controls the entire ATSC 1.0 and 3.0 broadcast chain and playout.



With Station Manager, broadcast chain management is performed from a single GUI.

BENEFITS

- Streamline broadcast work flows and enhance operational efficiency
- Ensure uninterrupted delivery of high-quality ATSC 1.0 and ATSC 3.0 services
- Choose broadcast chain vendors that meet your needs
- Save time and reduce operational costs
- Deploy on premises or in the cloud
- Contact U.S.-based customer support for quick resolution of service delivery issues

FEATURES

- Comprehensive control over the entire ATSC 3.0 broadcast chain and broadcast playout
- Centralized management of encoding, configuration, statistical multiplexing, usage metering, delivery, and service availability
- A single easy-to-use graphical user interface
- Handles ATSC 1.0 and ATSC 3.0 services
- Customizes to meet specific requirements of broadcast stations
- Manages fully redundant broadcast chains
- Supports both Triveni Digital and third-party ATSC 3.0 solutions

Contact us today to simplify your ATSC 1.0 and 3.0 operations
