# Station Manager

Broadcast Chain Management System

Unifies, Streamlines, and Simplifies Today's Broadcast Chain Workflows

The new Station Manager from Triveni Digital is an innovative management system that centralizes the configuration, control, and monitoring of ATSC 1.0 and ATSC 3.0 broadcast chains. Station Manager provides broadcasters with a single interface for managing every step of their workflows, including:

• **Encoding** • **ROUTE/MMTP Servers** • **Gateways** • **Statmux** • **Usage Metering** • **Delivery** • **Service Availability**

Station Manager controls the entire ATSC 1.0 and 3.0 broadcast chain and playout.

With Station Manager, you perform broadcast chain management from a unified GUI.

BENEFITS

- Streamline broadcast work flows and enhance operational efficiency
- Ensure uninterrupted delivery of high-quality ATSC 1.0 and ATSC 3.0 services
- Use the broadcast chain vendors that best meet your needs
- Save time and reduce operational costs
- Rely on U.S.-based customer support for quick resolution of service delivery issues

FEATURES

- Complete control over the whole broadcast chain and playout
- Centralized monitoring of encoding, configuration, statistical multiplexing, usage metering, delivery, and service availability
- A single, easy-to-use graphical user interface
- ATSC 1.0, ATSC 3.0, and virtual channels workflow management
- Broadcast station requirements customization
- Fully redundant broadcast chain integration
- On-premise or in the cloud deployment
- Triveni Digital and third-party equipment support

Gain control of your ATSC 1.0 and ATSC 3.0 operations.
