StreamScope® Portal

The Personal Portable MPEG Analyzer

StreamScope® Portal is the award-winning MPEG analyzer that makes it easy to troubleshoot DTV transport streams wherever you go. This full-featured tablet-based solution brings an unprecedented level of portability and convenience to video analysis, monitoring, and troubleshooting.

Touch-screen usability

Featuring a high-definition touch-screen user interface, *StreamScope Portal* is ideal for technical personnel who field test transport streams at multiple locations and varying hours. With *StreamScope Portal*, you get all the state-of-the-art features of the StreamScope MT-50 product line – the industry's most comprehensive MPEG workhorse – including alerts, video thumbnails, audio graphs, metadata tables, EPG data, system logs, and file-based analysis.

Convenient, flexible gateway

StreamScope Portal offers a variety of DTV input options, including Gigabit Ethernet, ASI, and RF. It can connect to other StreamScope MT-50 analyzers and StreamScope RM-40 remote monitors, as well as to the GuideBuilder® 5 EPG manager, to provide a complete picture of the health of video distribution plants.

Cost-effective quality assurance

Putting *StreamScope Portal*'s mobile tools and system access in the hands of key technical personnel will improve operational efficiencies and the quality of service for broadcast, cable, satellite, and IPTV operators.

Features and Benefits

- Use professional MPEG troubleshooting tools anywhere in real time
- Analyze MPEG-2, MPEG-4, HVEC, and DigiCipher streams
- Connect to StreamScope and Guide-Builder units for network quality control
- Touch-screen UI plus convertible keyboard for legacy software tools
- Play GigE, ASI, RF, and file inputs
- View video, audio graphs, alerts, tables, EPGs, PIDS, log files, and more
- Record transport streams and log files
- Verify PSIP/PSI/SI/ESG cross consistency
- Resolve sync issues with PCR jitter and accuracy analysis
- Maximize operational efficiency by freeing your technical staff

StreamScope Portal is a professional MPEG analyzer in an ultraportable convertible PC format.
